EXPLANATORY NOTES

Introduction

The Digest contains the latest available figures at the time of issue for a selection of monthly and quarterly series. Where possible, series are shown both in their original and seasonally adjusted form.

Seasonal adjustment

2. Measures of variability and details of the methods used in seasonally adjusting ABS statistics are given in Appendixes C and B, respectively, of *Seasonally Adjusted Indicators, Australia* (1308.0). This annual publication also contains historical original and seasonally adjusted data in tabular and graphical form of a selection of the statistics appearing in the ABS monthly and quarterly publications.

3. As well as being adjusted for normal seasonal factors, some of the statistical series included in the Digest have been adjusted for the effects of calendar variations, namely, 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, such as Easter and Australia Day.

4. Most of the original and seasonally adjusted series are preliminary and subject to revision.

Related publications

5. More detailed information is available in the *Monthly Summary of Statistics, Australia* (1304.0) (\$2.60). Publications from which the series in the Digest are derived are listed on page 8.

6. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Symbols and other usages

- r figure or series revised since previous issue
- p preliminary—figure or series subject to revision
- n.a. not available
- n.y.a. not yet available
- break in continuity of series (where drawn between two consecutive figures in the same column)

7. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

R. J. CAMERON
Australian Statistician

November			n.y.a.	1.57		337.0							

(a) Weighted average. Excludes rural. (b) Results of sample surveys of government employers and private payroll taxpayers conducted by the ABS as at the third Friday of the month shown. In the two years since its introduction, this series has not shown sufficient variation to warrant the continuation of the survey as a monthly collection; it will now be conducted quarterly, in August, November, February and May. For further details, see August issue of *Overseas Australia* (R330.0). (c) Quarterly series may be derived by averaging the three monthly figures. However, in some cases quarterly index numbers so derived differ slightly from the quarterly figure as published in *Consumer Price Index* publications due to rounding. (d) Base: December quarter 1968 = 100.0. (e) Base: September quarter 1976 = 100.0.

(a) The ABS has recently implemented a new system for collecting, compiling and publishing building activity statistics. For further details of the change to 'Building commenced' data, see September Quarter 1980 (Advance Release) issue of R705.0, released on 1 May 1981. For further details of the change to 'Dwellings commenced' data, see statement (issued under Catalogue number R703.0) entitled *Changes to Published Building Activity Statistics*, which was released on 12 December 1980. (b) Weighted average six State capital cities, 1966-67 = 100.0. (c) Base 1979-80 = 100.0.
